

Scope 1 (Direct GHG): emissions from sources are owned or controlled by the organization

Example: Releasing CO₂ emissions during the production of cement

Scope 2 (Energy Indirect GHG): emissions from the consumption of purchased electricity, steam, or other sources of energy generated upstream from the organization.

Scope 3 (Other Indirect GHG): emissions that are a consequence of the operations of an organization, but are not directly owned or controlled by the organization

Example: Business travel; Production of purchased goods
